KIT #1200
2005-2009 MUSTANG 4.6 PULLEY KIT

1. Remove the Belt by using a ½ breaker bar or ratchet on the tensioner.

2. Remove the Belt Tensioner

3. Remove the Pulley from the belt tensioner, and replace with Pt# 711. **Note:** The finished side of the pulley will be facing forward toward you when the belt tensioner is reinstalled.

4. Reinstall the Belt Tensioner with the new pulley.

5. Remove and replace the water pump pulley with the new Pulley and cap (1201-A).

6. Remove and Replace the Two Smooth Idler Pulleys with the Two provided (760-A) Idler Pulleys.

7. Remove and Replace the Grooved Idler Pulley with the provided (765-A) Idler Pulley.

8. Remove the Power Steering Pulley using a proper power steering removal tool.

9. Press the provided Power Steering Hub (602-A) on to the power steering shaft until it is flush with the top of the shaft.

10. Bolt the Power Steering Pulley (660-A) to the pressed on hub using the three provided 5/16 x 7/8" SHCS.

11. Check that all bolts are tight and everything is spinning freely.

12. Reinstall the Factory Belt.
